JOURNAL OF APPLIED ELECTROCHEMISTRY 16 (1986) 973–978

# *Indexes to Volume 16 (1986)*

The subject index has been organized into topics for easy reference.

## Subject Index

*Corrosion and protection, materials*

Application of the measurement of impedance to the corrosion of dental amalgams, The, 265
Electrochemical behaviour of graphite–epoxy composite materials (GECM) in aqueous salt solutions, 15
Properties and initial discharge behaviour of graphite fluorides decomposed under chlorine, 223

*Electrochemical analysis, sensors, instruments and methods*

Electrocapillary sensing devices. VI. Displacement meters, 287
Etude des propriétés électriques et électrochimiques d'un réseau de polyuréthanne à base de polyéther chargé de perchlorate de lithium, 75
Measurement of electrolytic conductivity in highly conducting solutions, 678
Performance of zirconia membrane oxygen sensors at low temperatures with nonstoichiometric oxide electrodes, 28
Pressure build-up in aluminium electrolytic capacitors under stressed voltage conditions, 109
Solid state potentiometric oxygen gas sensors, 475

*Electrochemical engineering, cell modelling and performance*

Copper recovery from dilute solutions in the Falling-Film cell, 365
Effect of gas evolution on current distribution and ohmic resistance in a vertical cell under forced convection conditions, 615
Estimation of the residual capacity of sealed lead–acid cells using the impedance technique, The, 555
Experimental study of a fixed bed chlor-alkali reactor, An, 457
Model-based analysis of heat transport in electrolytic reactors, A, 250
Note of the effectiveness of fixed bed electrodes, A, 768
Numerical models for reactions catalysed by homogeneous mediators: the case of Fenton's reagent, 812
Recent developments of the chlorine industry in Japan, 317
Secondary current distribution in a two-dimensional model cell composed of an electrode with an open part, 291
Selectivity analysis in electrochemical reactors. I. Experimental study of an electro-organic reaction coupled with parasitic homogeneous chemical reactions, 836
Selectivity analysis in electrochemical reactors. II. Engineering models of a batch reactor with a complex reaction sequence, 851
Simultaneous electrochemical removal of copper and chemical oxygen demand using a packed-bed electrode cell, 121
Stability of an electrolytic alloy deposition process, 82

*Electrochemical machining*

Electrochemical maching of refractory materials, 345

*Electrochemical mass transfer*

Electrochemical study of liquid–solid mass transfer in packed bed electrodes with upward and downward co-current gas–liquid flow, 947
Mass transfer at carbon fibre electrodes, 422
Mass transfer characteristics of gas-sparged fixed-bed electrodes composed of stacks of vertical screens, 374

*Electrode kinetics, catalysis*

Anodic characteristics of amorphous palladium–base alloys in sodium chloride solutions, 565
Anodic oxidation of poly(*N*-vinylcarbazole) films, The, 239
Behaviour of platinized platinum electrodes in acid solutions: correlation between voltammetric data and electrode structure, The, 693
Correlation of electrochemical and ellipsometric data in relation to the kinetics and mechanism of $Cu_2O$ electroformation in alkaline solutions, 517
Current efficiencies and regeneration of poisoned Raney nickel in the electrohydrogenation of glucose to sorbital, 941
Dissolution and passivation of polycrystalline iron electrodes in boric acid–borate buffer solutions in the 7.5–9.2 pH range, The, 490
Electrochemical behaviour of $CuO–TiO_2$ catalysts, 281
Electrodissolution kinetics of an Fe–Ni alloy in acidic chloride media of 1.0 M ionic strength, 605
Etude de la reduction électrochimique de $AlCl_3$ dans le dimethylsulfoxyde a 25° C, 196

*Electrosynthesis*

Chemical evolution of $CO_2$ by electrocatalytic oxidation of vanadium-impregnated coke anode material, 357
Conductivité électrique totale de sels doubles de type iodure d'argent–polyiiodure de N pentylène N′ alkylène tétraméthyl N, N, N′, N′, diammonium, 505
Electrochemical chlorination of butadiene using $CeCl_3$–MeCN anolyte, 304
Electrochemical oxidation of aliphatic hydrocarbons promoted by inorganic radicals. II. $NO_3$ radicals, 8
Electrochemical route to trimethylhydroquinone, An, 575
Electrochemical synthesis of 4-aminobenzoic acid from 4-nitrobenzoic acid: fundamental aspects, 825
Electrochemical synthesis of tetra-alkylthiuram disulphides in emulsions, 907
Electrochemical synthesis using reactant-incorporated graphite powder electrodes: the reduction of *p*-dinitrobenzene in dilute aqueous acid, 213
Electrolysis cell with close consecutive flow-through porous electrodes for particular organic electrosynthesis, An, 819
Hydrogénation électrochimique du dinitronaphthalène: comparaison avec le procédé catalytique, 803
Indirect electrochemical process for the production of naphthaquinone, An, 885
Indirect electrosynthesis of *p*-methoxybenzaldehyde, 757
Indirect hydroxylation of aromatic rings using electrochemical methods, 440
Influence of cell design and electrolysis parameters on the cathodic coupling of butadiene and carbon dioxide in acetonitrile. 1. Undivided parallel plate configurations, The, 791
Mediated reduction of CO and $CO_2$ to methanol by surface-confined metal complexes in the presence of homogeneous catalysts, 732
Reaction kinetics and reaction techniques for mediated oxidation of methylarenes to aromatic ketones, 134
Role of amines as complexing agents in film growth during electropolymerization of ester substituted phenols onto mild steel, The, 393

*Energy conversion, power sources*

Antimony in lead–acid cells. III. Transport measurements, 879
Cycling behaviour of zinc electrodes in a nickel oxide–zinc accumulator, The, 175
Effective conductivities of FeS positives in LiCl–LiBr–LiF electrolyte at different states of charge, 309
Electrochemical oxygen separator using an ion-exchange membrane as the electrolyte, An, 935
Electrodeposited $CdSe_{0.5}Te_{0.5}$: photoelectrochemical solar cells, 168
Factors affecting the discharge lifetime of lithium–molten nitrate thermal battery cells using soluble cathode materials, 636
Improved slurry zinc/air systems as batteries for urban vehicle propulsion, 527
Influence of superimposed alternating current on capacity and cycle life for lead–acid batteries, 894
Investigation of the solid-state cell $Cu/Rb_4Cu_{16}I_7Cl_{13}/Cu_xTiS_2$, An, 23
Lead dioxide electrode, The, 159
Measurement of short circuit current for low internal resistance batteries, 513
Photo-electrochemical solar cells with a $SnO_2$–liquid junction sensitized with highly concentrated dyes, 683
Predicted and observed initial short circuit current for lead–acid batteries, 631
Process modelling in the porous molten carbonate fuel cell (MCFC) cathode, 643
Room temperature discharge characteristics of $Li/NH_4NO_3$–$LiNO_3$–amide cells using silver salts as active cathode materials, 920

State-of-charge measurement of the lithium–carbon monofluoride battery by chronopotentiometry, 307
Studies on the effect of cobalt addition to the nickel hydroxide electrode, 274
Study on the swelling of a sintered nickel hydroxide electrode, A, 403
Voltage increase of copper compound electrodes resulting from the addition of sulphur for seawater batteries, 431

*Metal deposition, surface finishing*

Current levelling behaviour under pulse current electroplating conditions: the role of reaction pseudocapacitance, 189
Effect of impurities on the anodic process in an industrial pyrophosphate copper bath, The, 463
Electrochemical monitoring of electrogalvanizing solutions, 913
Electrochemical reduction of potassium from potassium chloride in propylene carbonate electrolyte with aluminium anodes, 339
Electrodeposition of metals onto polypyrrole films from aqueous solution, The, 62
Electroplating of Fe–Ni alloys: effects of sulphamic acid and sulphosalicylic acid, 69
Estimation of the coulombic efficiency of zinc electrodeposition by measurement of current efficiencies at a rotating ring disc electrode, The, 387
Kinetics of copper electrodeposition in citrate electrolytes, 591
Microthrowing power of electrolytes for the deposition of nickel–iron alloys. I. Components determining the levelling effect of nickel–iron plating electrolytes, 669
Microthrowing power of electrolytes for the deposition of nickel–iron alloys. II. Levelling effect of iron in nickel–iron electrolytes and its microdistribution in the alloy coating, 673
Nucleation of lead from halide-containing solutions, The, 333
Phase composition and structure of silver–antimony alloy deposits plated from ferrocyanide–thiocyanate electrolytes, 867
Spongy electrodeposit formation, 771
Structural effects during the electrodeposition of silver–antimony alloys from ferrocyanide–thiocyanate electrolytes, 875
Structure of silver electrodeposits plated from different complex electrolytes, 703

*Membranes*

Effect of electro-osmosis on the synthesis of lead and tin fluoroborates, The, 116
Interactions between large organic cations and cation exchange membranes, 41

*Mineral electrochemistry, hydrometallurgy*

Aluminium cathode effects in zinc electrowinning from industrial acid sulphate electrolyte, 127
Behaviour of a copper–AISI 304 stainless steel mixed anode in electrolytic copper refining with periodic current reversal, 93
Comparative study of the oxidative and reductive dissolution of magnetite in acidified $CuSO_4$–acetonitrile–$H_2O$ and $CuCl_2$–NaCl–$H_2O$ leach solutions, A, 745
Coulombic efficiency of zinc electrowinning in high-purity synthetic electrolytes, The, 654
Effects of As(III) and As(V) on zinc electrowinning from industrial acid sulphate electrolyte, The, 899
Effects of nickel and cobalt and their interaction with antimony on zinc electrowinning from industrial acid sulphate electrolyte, The, 53
Electrochemical behaviour of silver sulphide in sulphuric acid solutions, The, 719
Electrochemistry of the chalcocite–xanthate system, 544
Electrowinning of zinc from alkaline solutions, 447
Extraction of gallium metal by exchange reaction between sodium amalgam and Ga(III): a cyclic voltammetric study, 929

*Molten salt systems*

Activity of anodic oxide films on metal and cermet anodes in cryolite–alumina melts, 147
Effect of fluorspar on electrowinning of magnesium, 626
Electrochemical behaviour of some transition metal oxides in molten dimethylsulphone at 150° C, 379
Electrochemical reactions of $H_2S$ in molten sulphide, 583
Electrochemistry of nitrate–amide melts: reactions of nickel and copper in nitrate–amide melts, The, 229
Electrochemistry of nitrate–amide melts: reactions of the calcium anode in room temperature nitrate–amide melts, The, 101
Electrolytic production of magnesium: effect of current density, 775

High-temperature electroplating of chromium from molten FLINAK, 737
New bath for the electrodeposition of aluminium, I. Conductivity measurements, A, 707
Reference electrodes and barrier junctions in chloride melts containing magnesium chloride, 967

*Solid state, oxide films (see also Electrochemical analysis/sensors)*

Characterization of oxide layers on copper by linear potential sweep voltammetry, 413
Determination of mixed ionic and electronic conduction in commercial-grade magnesia-stabilized zirconia electrolyte, 712
High ionic conduction in tetragonal solid solution of the system $La_2O_3$–$MgF_2$, 259
High temperature-type proton conductive solid oxide fuel cells using various fuels, 663
On the duplex layer nature of anodic $Al_2O_3$ films, 964

*Miscellaneous*

Electrochemistry of coal and coal liquids. II. Cyclic voltammetry of H-coal liquids, The, 203
Information sources for electrochemistry, 1
